

## HomeMove

## Environmental Policy

HomeMove is a Melbourne based removals and transport business specialising in local residential and commercial relocations. HomeMove believes in a holistic approach to business that adheres to a triple bottom line policy of social, environmental and economic wellbeing.

### **Our Mission**

HomeMove seeks to excel in all aspects of business and is committed to minimising the environmental impacts of our business operations.

### **We commit ourselves to:**

- Ensuring that we comply with all relevant environmental laws and regulations.
- Continuously measuring and improving our environmental performance.
- Promoting the development of employee, customer, industry and community environmental awareness and protection.
- Using the principles of reduction, reuse and recycling to manage waste generated from our business operations.
- Taking into account environmental factors when selecting goods and services. For example:
  - the use of 100% recycled moving boxes and recycled or wheat based paper for stationary supplies.
  - the use of Sancell Envirobubble – Bio Degradable Bubble Wrap for many of our packing requirements.
- Developing and introducing business practices which help reduce environmental waste. For example our reusable removal box hire service.
- Calculating and offsetting carbon emissions caused by our business activities.
- The use of hybrid-electric vehicles within our fleet.
